

# High Adventure Literature

The High Adventure Teams in the San Diego-Imperial and Los Angeles Area Councils have prepared extensive material pertinent to your Unit's High Adventure Program. Hike Aids and Trek Aids focus on High Adventure in the local mountains, deserts, and waterways, with a Scouting perspective. In this regard, they supplement BSA-National Council and commercially available publications. Knowledge of their contents is a requirement for Units seeking long-term backpacking awards. These items may be downloaded from the HAT website for each Council. The following indices show the number, title, and issue date for each new/revised brochure in these series.
